

Seattle Business magazine presents

Call for Nominations!

Deadline: November 16, 2009

Seattle Business magazine is seeking nominations for its second annual Leaders in Health Care, an awards program honoring outstanding individuals, companies and organizations for their leadership, innovation and contribution to improving health care in Washington state.

Washington has long ranked among the nation's leaders when it comes to providing state-of-the-art health care. Help us recognize the dedicated professionals that make our state a leader in health care and life sciences.

- Honorees will be profiled in the March 2010 issue of *Seattle Business* magazine and honored at an awards dinner on February 25, 2010, at the Columbia Tower Club in Seattle.
- A panel of health-care industry professionals will select the winners.

Awards will be given in seven categories. You may nominate in more than one category.

- **Lifetime Achievement Award** Awarded to an individual for his or her lifetime contribution to the improvement and advancement of health care in Washington.
- **Outstanding Health Care Executive** Awarded to the administrator (or team) at a hospital or healthcare provider in Washington state who has made exceptional contributions that raised the quality of health care while reducing costs.
- **Outstanding Health Care Professional** Awarded to an individual who has demonstrated exceptional contributions to health care. This category is intended for health care practitioners, not administrators (see above).
- **Employer Achievement in Developing Wellness Programs** Honors the company or organization that provides the most effective and innovative wellness programs to its employees.
- **Outstanding Achievement in Community Outreach** Awarded to an individual or organization for development of a program that provides access to or improves the quality of health care in under-served areas or rural areas or to under-served populations.
- **Outstanding Health Care Volunteer** Honors an individual who commits their time and talent to serving others in a health care setting—a hospital auxiliary group, board of directors, public health or a free-standing program.
- **Outstanding Achievement and Innovation in Life Sciences** Awarded to a company or an individual in the Washington life sciences community for outstanding achievement in research and innovation in the fields of biotechnology or biomedicine.
